

# Canada Observatory

## Northern Civic Atlas Colour Palette

A natural, credible, and distinctive palette for a Canadian public-data observatory. Use the maroon as the core Canada/highlight colour, with navy for authority, lake blue for data connections, and boreal green for land and environment accents.

|                                                                               |                                                                 |                                                                         |                                                                             |                                                              |                                                   |                                                                |
